WHY E-LEARNING?

Technological improvements and advances in educational design mean that e-learning is no longer just a low cost alternative to traditional training methods. In many respects our courseware offers training which is superior to the majority of available "classroom" options.

Not only is the effectiveness of the training process enhanced, but also the convenience and overall cost efficiency of e-learning makes it a compelling option for training. Staff learn what they need and training can be targeted at specific individual requirements, any time, any place. Staff also learn at their own pace and can repeat each section as many times as required during the course and as a refresher.
